

Adoptions and DNA: Finding Long Lost Family

Review two adoptee's stories of how living biological relatives were found. Learn DNA basics, DNA search tips and understanding DNA testing results. Learn to build a DNA Match's family tree with documented resources. Learn to ask questions and finding answers in online resources. There is enough content, technique and intrigue to interest every family historian.

South King County Genealogical Society Welcomes **Leslie Edmunds**

Leslie Edmunds is an expert-level family historian and consultant trainer. She has been developing skills over the last 40 years and enjoys sharing tips and techniques to mine a resource to its fullest potential. She is often heard saying "It's crazy but true; when I look, I find." Leslie is known for starting with the vaguest of clues to discover entire family lines for other people. Leslie has recently completed projects in compiling surname family units over three centuries in ancestral locations, finding living biological relatives of adoptees, creating biographical stories/timelines from newspapers, creating sourced only family trees, tracing Quaker immigrants, researching civil war participation and using government-sponsored digital archives and demographic databases to hone her skills and develop new resource knowledge.
